MicroSurvey Partners with FOIF

Westbank, BC - September 15, 2009 - China and Canada partner together to deliver new products to the world market.

Today MicroSurvey and FOIF are pleased to announce that FOIF is introducing a new product line based on MicroSurvey's market leading surveying software technology. For almost 25 years MicroSurvey has been the most popular and best selling surveying software in Canada. FOIF has chosen MicroSurvey CAD as its desktop software and MicroSurvey FieldGenius for field software. **FOIF Geomatics CAD 2009** and **FOIF FieldGenius** will be shipping in the fourth quarter to FOIF dealers around the world. These special versions will have custom features developed to extract the highest performance possible from the latest FOIF A20 GNSS Receivers and RTS/OTS 810 Windows CE total stations. In addition, FOIF will have handheld data collectors running FOIF FieldGenius for the 650 and 680 series of total stations.

Suzhou FOIF Co., Ltd. has been designing and manufacturing optical instruments since 1958, and is considered by many to be the leading instrument manufacturer in China. FOIF has been awarded a Grade AAA certificate from the Chinese government for quality and performance. An ISO 9001 certified company, FOIF builds a variety of optical and now GNSS products for surveyors, contractors, and engineers.

MicroSurvey Software Inc. has been developing software and hardware solutions for surveying and mapping for over twenty years. MicroSurvey Software is a two-time winner of PROFIT Magazine 100 Fastest Growing Companies and a winner of Deloitte Technology Fast 500. Both have recognized MicroSurvey Software for its outstanding sales growth.

MicroSurvey Software Inc. is also spearheading the code free linework revolution in the data collection software market with its revolutionary FieldGenius 2010, the fastest data collection software available.
