Jindal Steel Plant  
*Jajpur, Odisha*

Janak and Mr Devender visited Jindal Stainless Ltd for the training of Electronic total station and its application in a steel plant.

Devender along with his team worked in high temperatures amidst cast iron, molten steel and steel cast application in a steel plant.

He did setup of instrument on iron plate 50 feet above ground to calibrate and check all meeting points of the steel plant, all very carefully and courageously.

That's Devender's courage and willpower, not to get afraid of targets amongst the crowd.
